

COMMERCIAL PROPOSAL & TECHNICAL SPECIFICATION

Critical Care Interactive Mobile App & Admin Platform

iOS & Android Mobile Applications • Unified Owner Admin Web Portal • Automated GitHub Sync

1. Executive Summary

This proposal outlines the transformation of your interactive medical prototype into a **full-fledged, cross-platform mobile application (iOS & Android)** backed by a modern cloud database and a dedicated **Owner Admin Web Dashboard**.

The platform includes an automated **GitHub Detection & 1-Click Publishing Workflow**, enabling you to safely add, preview, monetize, and update clinical simulators at any time without ongoing developer costs or App Store delays.

2. Core Deliverables & Key Features

A. Native Mobile App (iOS & Android)

- Cross-Platform Performance:** High-performance, smooth experience on both Android phones and iPhones.
- 15+ Clinical Simulators Integrated:** Live Cardiac ECG Monitor, ARDS Ventilator Calculator, ACLS/CPR Guidelines, Stroke V6, TBI ICP Decision Tree, Shock & Hemodynamics, ABG Interpreter, etc.
- User Accounts & Login:** Frictionless signup/login with Email and Google Accounts.
- Pro Paywall & Subscriptions:** Built-in subscription gate to lock premium simulators for paid members while offering free trial/starter cases.
- Clinical UI & Offline Caching:** High-contrast clinical theme, instant search filters, and local caching for rapid offline response.

B. Unified Owner Admin Web Dashboard (1 Single Portal)

A private, secure website accessible from your phone or laptop to manage your entire platform:

- GitHub Auto-Detection:** Automatically detects when a new .html simulator is uploaded to your GitHub repository and flags it as *"New Simulator Found"*.
- Safe Draft & 1-Click Publishing:** New files are NEVER live automatically. Preview and test them inside the dashboard, set them as **[Free]** or **[Pro]**, and click *"Publish to App"* with one click.
- Instant Free vs. Pro Locking:** Switch any simulator between Free and Paid with a simple toggle switch.
- User & VIP Access Management:** View registered doctors/students and give free VIP Pro access to guest faculty, colleagues, or institutions.
- Broadcast Push Notifications:** Send alerts to all doctors' phones when a new medical case or guideline is released.

3. Cloud Database & Infrastructure (What We Use & Cost)

We use **Google Firebase (Firestore) / Supabase** for authentication, user profiles, and real-time simulator synchronization:

Usage Tier	Scale / Capacity	Monthly Cost
Launch & Growth Tier <i>(Recommended)</i>	Up to 50,000 active users, 1GB cloud storage, 50,000 daily reads	₹0 / month (100% Free Tier)

Usage Tier	Scale / Capacity	Monthly Cost
High Scale Tier <i>(Future Growth)</i>	Millions of database operations, unlimited user bandwidth	Pay-as-you-go (~₹1,500 - ₹2,000/mo) only after substantial revenue

4. Official App Store & Google Play Publishing Fees

Official developer fees paid directly to Apple and Google by the owner so the app is published under your own hospital/brand name with 100% direct revenue payout to your bank account:

Platform	Official Fee (USD)	Approx. Cost (INR)	Payment Frequency
Google Play Console <i>(Android)</i>	\$25 one-time	~₹2,100	One-time (Lifetime validity)
Apple Developer Program <i>(iOS)</i>	\$99 / year	~₹8,300 / year	Annual recurring subscription
TOTAL Store Account Fees	—	~₹10,400	Paid directly to Apple & Google

5. Fixed Development Cost Breakdown

#	Deliverable / Module	Cost (INR)
1	Mobile App UI/UX & Shell (Android & iOS navigation, search, clinical theme)	₹10,000
2	15+ Clinical Simulators Integration (ECG Canvas, ARDS, ACLS, Stroke, TBI, Shock)	₹14,000
3	Unified Admin Dashboard + GitHub Auto-Detection & 1-Click Publishing	₹14,000
4	User Accounts, Cloud Database & Pro Paywall Subscription System	₹5,000
5	Testing & Store-Ready Packaging (Google Play AAB & Apple TestFlight)	₹2,000
TOTAL FIXED DEVELOPMENT INVESTMENT		₹45,000

6. Milestone Payment Schedule

Milestone	Deliverable Stage	Amount (INR)
Milestone 1 (40% Advance)	Project initiation, Cloud Database setup, Mobile UI shell & User Login	₹18,000
Milestone 2 (40% Beta)	All 15+ simulators live in mobile app + Admin Dashboard & GitHub sync	₹18,000
Milestone 3 (20% Final)	Final QA testing, store packaging, live deployment & full source code handover	₹9,000

7. Inclusions & Support Guarantees

- 100% Full Source Code Ownership: Complete code handover with zero vendor lock-in.
- Lifetime Self-Updating Capability: Add unlimited new medical simulators via GitHub without developer costs.
- 14-Day Post-Delivery Warranty: Complimentary bug-fixing and technical assistance after handover.

- **Zero Server Headache:** Built on Google Cloud free tier with zero ongoing server maintenance costs.
